Unions Here in Constant Communication With European Workers, Says Gompers.

REFUSES A. F. OF L. AID TO "FRIENDS OF PEACE"

Denounces Organization as Unneutral and Partisan of One Warring Nation.

As the result of a controversy beween John Brisben Walker, the New fork editor and economist, and Samuel Gompers, president of the American our country, and it aims to speak not only for the organized, but for the today that officers of the federation have been, in Mr. Gompers' language, "in almost uninterrupted communica tion with the representatives of organzed workers of the countries now en gaged in war," and in a letter to Mr. Walker Mr. Gompers declares:

"When the time shall have become tipe for any decisive movement to be made in the interest of peace, all may rest assured that no effort will be left

untried to accomplish peace."

The news that the great labor organization is working with labor men in Europe, in the hope of seizing on an pportunity to make peace, was disclosed as a result of a request by Mr. Walker that Mr. Gompers give the support of the federation to "The Friends Peace," an organization of which Mr. Walker is national chairman, which proposes to hold a big convention soon

Mr. Gompers refused the support asked and made public in Washington his etter to Mr. Walker, from which the above extract is taken. In his letter that body and also president of the Mr. Gompers attacks "The Friends of Peace" and charges that paid emissaries of that organization have by prior to the next congress, to be held alse representations attempted finanises one official of the organization having been an active worker in with having been an active worker in half a dozen movements each the very antithesis of the other.

#### Mr. Gompers' Letter.

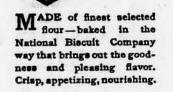

in Buenos Aires. Argentina, in 1918.

The evident desire of the delegates from the South American republics to have closer relations with the United States impressed Dr. Johnson greatly. He was also impressed by the manner in which the South Americans keep pace with alf discoveries in the science of medicine. Many excellent papers were read, not only from physicians in attendance, he said, but also from others who were unable to be present. Mrs. Johnson, who speaks French and Spanish, the two prevailing languages at the sessions, was presented with a handsome sliver vase by the delegates. Following the sessions at San Francisco all the delegates were the guests of the government in a trip to the various cities along the coast, the exposition at San Diego, the Grand Canyon, the Yosemite and the land of the giant sequola trees. Mr. Gompers' letter is, in part, as fol-

"If it were at all possible for me to regard the movement in which you are engaged or the meeting at Chicago as prompted in the interest of peace, a peace which any loyal American, any true, intelligent, faithful worker could support. I would not have hesitated a moment to have found immediate opportunity to pledge my most earnest and active co-operation; but from my knowledge of events which are transpiring and have occurred it is not peace which is being furthered by your movement and your meeting, but your purpose is to place the people of the United States in a false position before the world, to play into the hands of one side of the warring nations as against the other. Carried to its logical conclusion, your movement would make of the United States not only an unneutral nation, but would lead to the direct limits of militarism in every country and in its worst form.

"With your letter you addressed to the union workers of the United States.' In that circular you rightly say that militarism is the deadliest fee of labor. That is a position for which the labor movement of America has stood from its earliest inception, and from which no labor man within the wide range of my acquaintance has departed. It is a position for which the American Federation of Labor will contend to the uttermost. Therefore, all the more astounding is the insinuation which you make in your next paragraph, when you say, 'If there are those in the ranks of labor or amongst its officials who would side with militarism they must be regarded as in secret league engaged or the meeting at Chicago as prompted in the interest of peace, a
